Age

Hello! I'm Hao-Hsi. I am a front-end developer with a slow personality, careful and conscientious, who likes to specialize in research principles to realize front-end pages. Good at native JavaScript, CSS code writing and familiar with the application of React and Angular framework.

I have always believed that technology has always come from human nature.

React SPA Book Search Engine The project is a React-based single-page application that mimics

a small book search engine system from Books.com. Users can enter book keywords in the search box, and the system will

return relevant results. What's more, users can add interested books to the tracking list, so as to track the prices and total amount of these books in the future.

Positive-to-negative emotion ratio

Practice Spiritual Time House

During these nine weeks of activities, I participated in "The F2E -Front-End Practice Spiritual Time House", and there are challenges with different themes every week. I used ZekiCore.js,

a small framework I developed, and applied it to the weekly challenges and tried to complete various tasks.
